PartnerTech develops and manufactures products for leading firms in the IT, Industry, Engineering, CleanTech and Medical technology industries. We serve both large and small companies, primarily in the business-to-business segment.

As a contract manufacturer, our clients are companies who want to avoid using their own resources to create global structures for production, distribution and other functions, and instead want the freedom to focus on product development and marketing. By working with PartnerTech, they are able to shorten their time-to-market and lower their cost per manufactured unit, ultimately freeing up time, resources and capital.

With approximately 1,600 employees in Sweden, Norway, Finland, Poland, the UK, the United States and China, PartnerTech reported sales of approximately \$400M in 2007. PartnerTech AB, our parent company, has its head office in Malmö Sweden and is listed on the OMX Nordic Exchange in Stockholm.

At PartnerTech US, our mission is to be the best conceivable partner for our customers. We work with all our global facilities to always provide our customers with the shortest lead times, highest quality, and lowest prices, every time. Our 36,000 square foot facility opened in 2000 and we continue to grow.
